Stressed It seems that this happens when there are serval opponents at once. Not every time, but very often. I doubt my equipment is too bad. I got the GTX 980, i5 6600k and 8GB ram (okay, it's a bit low these days, but should be good). I hope someone can help me. RAW entry is fixed for the BF4, but Anthem does not have that option. I don't know what to do. My mouse is not broken because this is the 2nd game. I got this issue (like about 5 years old) and this mouse is only around 6 months. Thank you in advance for any hint! Сообщение 1 из 97 (10,174 Просмотров) Выделенные выделенные выделены выделены выделены выделены выделены выделены 02-08-2018 #1 мой друг получил мышшь отстаивание в r6 я не знаю, почему мне нужно решение для этих вопросов, пожалуйста, это его PC спецификации и цель не гладкая, потому что мышшь отстаивание это чувствовать себя, как с 1 чувствительный он также получил хороший FPS 90 нет FPS падение не замораживания 02-08-2018 #2 у меня есть тот же вопрос, мои FPS были 99 и до сих пор так лага чувствю Это unplayable, как 02-09-2018 #3 Y вас есть решение для этих вопросов? 02-09-2018 #4 I actually tinkered yesterday and went to the nvidia geforce experience and choose the recommended settings of them and then resumed the r6 went to the setting, then the graphics then f9 for automatic customization detection, which seems to be sorted for me. 02-09-2018 #5 02-12-2018 #6 @Ubi-Trippin Will you ever actually officially address this issue of stuttering mouse? Countless people have reported this, but you keep quiet. It's very disappointing. Video question: 2 people found this useful 06-08-2020 #7 originally published aldojack Jump to the original post I actually messed up yesterday and went to the Nvidia geforce experience and choose the recommended settings of them, then resumed the r6 went to the setting, then the graphics then f9 for automatic customization, which seems to have sorted it for me. Do you mean optimization? I have on lower settings than optimize settings I have gtx 1650 and Intel core i7-9750H processor 2.60Gz I also do not have a gaming mouse, so this could be a problem 06-09-2020 #8 Hi AhmadXD_11 Because of the character, how old this thread was, I'll close it. If you are having problems, please try the steps in this article. If the problem persists, please contact us or you can create a support ticket and include system files. This is explained in the article I linked above. Thank you! The game of stuttering is becoming very common these days. Many gamers report their game of stuttering between them, but they are helpless in this matter. A similar case with Rainbow Six Siege, which increases the level of frustration of gamers with its continuous stuttering and lagging questions. Many times the problem is due to buggy games, but sometimes your computer can Culprit. It's hard to infer where the problem is, but solving it can give you some answers. In this article we we Some fixes that can help you get rid of Rainbow Six Siege FPS stuttering, R6S mouse lag, and lag spikes. Fix: Rainbow Six Siege stuttering and lag on PC Don't worry if your game stutters. Just follow these simple and quick fixes to get rid of it instantly: Fix #01 - Make sure to meet the minimum hardware requirements As the game comes with specifications that should be in your computer so that the game can run peacefully. The Rainbow Siege lag spikes that you observe while playing may be because your computer does not meet the requirements of the game. Here's the minimum requirement for Tom Clancy Rainbow Six Siege that should be on your computer - Operating System: Windows 7/8/10/Processor: Intel Core i3 560 and 3.3 GHz or AMD Phenom II X4 945 and 3.0 GHz- 6GB Video Cards: NVIDIA Ge GeX GTX 460 or AMD Radeon HD 5870 (DirectX-11 Compatible with 1GB VRAM)DVD ROM Drive: DVD-ROM Dual LayerSound: Directx 9.0c Compatible Sound Card with the latest DriversHard Drive: 30 GBMultiplayer: Broadband connection with 256kbps upstream or fasterIf any of this requirement is missing from your computer, Try to update it, so you can play this game without any mistakes. Fix #02 - Limit your FPSRainbow Six Siege FPS stuttering can be corrected by simply adjusting the FPS limit of the game. Here's how you can do it: Go to my game folder. Now, find the Rainbow Six Siege folder and go to GameSettings.iniSearch for DISPLAY lineOnce there, set the FPS limit to 60 or below Save it and run the game to see if stuttering exists or not. This is one of the most effective ways in which many gamers have been able to solve this problem with their Rainbow Six Siege. If this fix doesn't work for you, then move on to the next fix. Fix #03 - Install the latest PatchA many times, the old version of the game can also cause problems during the game and Rainbow Six Siege is no exception. Ubisoft continues to come up with the latest game updates to eliminate any bug that may cause stuttering. If your game continues to stutter and there is no reason to find it, then check out Ubisoft's official website to see if there are any new Updates to Rainbow Six Siege or not. If so, install an update and run the game to see if the problem exists or not. Fix #04 - Updating graphic drivermany gamers say that updating driver graphics is a light cure for the Six Rainbow Siege input backlog. You can just update the driver graphics to get rid of many problems. To update the graphics driver, follow these simple steps: go to the graphics manufacturer's website (Nvidia, AMD or Intel). Look for the latest driver update that's compatible with your Windows version and download it. Twice on the downloaded file and follow the instructions on the screen to install the driver. Restart your computer and run the game again to see if it's working normally. Once the update is complete, start the game and see if the problem exists or not. Fix #05 - Close background apps and downloadrunning other others The background can also cause your game to stutter. Check if any apps or downloads are running in the background and close them to play Rainbow Six Siege peacefully. Just open Task Manager, check out all the apps and downloads that slow down your computer, and close them as long as you play the game. Fix #06 - Run the Rainbow Six Siege in one core You can simply disable the Core 0 processor in your computer, causing a stutter in the task manager. Here's how to do it: Click Ctrl-Shift-Esc to open Task Manager.Click on Details.Look for Rainbow Six Siege .exe file, then right click on it and select Set Affinity. Now, don't stop the CPU 0 box and click OK. Restart the game to see if the stuttering exists or not. Fix #07 - Lower setting graphics on your gameY can also reduce the graphic settings of your game to get rid of rainbow six siege lag spikes. Here's how to do it: First, you have to run your game in Windowed mode. Then go to the settings in the game. Make sure the V-Sync is off. Set game graphics settings such as texture quality, shading and other effects for Low.Apply changes and run the game. See if your game is still lagging or stuttering. If not, congratulations - but if so - check out the latest fix below. Fix #08 - Changing your PCSometimes power plan affects the performance of the game. For example, if your computer is in a balanced mode, it may interfere with graphics and processor functions. Here's how you can fix it: Tap Windows-R on the keyboard and then on The Run Dialogue, enter powercfg.cpl. Now hit Enter.When the screen appears, expand to hide additional plans and choose high performance. Enter the advanced search box in the top right corner, and then click View Advanced Settings system. In the pop-up, click on the settings... in the PerformanceClick on Adjust section for better performance and click OK. Start the game and see if it fixes the problem. That's it. These are all fixes that can help you fix your game quite easily and quickly. If you have any questions, feel free to ask in the comments below. READ MORE Six Sieges won't be launched? Here's a Fix First, sry for my English. I don't have much knowledge because I'm from Mother Russia. Hello everyone, after I came to the R6 siege, I play CS:GO a lot, but CS suck a lot right now and here I am. After a free weekend, I bought an R6 and started playing and something went wrong with my mouse. IT STUTTERS. I Google a lot on Reddit, ubi forums, steam forums, other kill games forums. And here's a list of possible fixes: Fastsync-75fps cover 800dpi help meDownload Nvidia inspectorAdd R6 Siege profile on itFind FastSync option and include it as well as include Buffering. Fps Limiter: limit on 70-80 fps (cuz if fps go uper after that 80 fps, then the use of cpu rises to 100% (that's why the mouse lags). 800 dpi on my Razer Deathadder. For the task manager--gt; find RainbowSixGame.exe - the right click to set the priority low. My mouse (Deathadder Chroma) stop stuttering forever even at 500 Hz pollingrate.2) Lower poll speed of about 250hzA a lot of people this thing helps, hope its helps you too. The game's settings take off FXAA, don't know why, but with the FXAA mouse go crazy, the speed of the No.1 vsync poll will make the mouse much smoother. Nvidia control panelTriple buffering: ON, helps a lot. Maximum pre-visualized frames: 1Power control mode: I prefer maximum performanceGamesetting.iniMaxGPUBufferedFrame-1Rumble-1, IDONTKNOWWHY, but 1 instead of 0, make the mouse more responsive, can be the placebo effect. MouseSensitivity-1 MouseYawSensitivity-10 MousePitchSensitivity-10. Yaw and Pitch his X and Y axes when his 10, its reduce stuttering a bit. If you want the sense you play with here formula: YourSens>Your MouseSensitivityMultiplierUnit10>Your new MouseSensitivityMultiplierUnit7) Resolution and BorderlessWindow Fix stuttering, I can't play my native resolution because of potato PC. DriverRoll back to 359.06 nvidia driver. The game works much better with it. DPI and SensHigh DPI with low Senators Lee 800 DPI minimum, and mouse stutter is gone! Hopefully one of these points can help some of you. If anyone finds a mistake, don't get angry, just write here, and I'll fix it. From Russia with love!
